**Additional Information:**

We estimate that the net proceeds from this offering (excluding the accrued interest paid by the purchasers), after deducting underwriting discounts and commissions and estimated offering expenses payable by us, will be approximately \$129 million. The net proceeds from this offering will be used to reduce outstanding borrowings under our senior secured revolving credit facility. As of July 31, 2009, after giving effect to this offering and the use of the net proceeds, our borrowing base would have been reduced to approximately \$938 million, and we would have had approximately \$425 million (excluding \$4 million of outstanding letters of credit) in outstanding borrowings under our senior secured revolving credit facility, providing us with approximately \$509 million in liquidity under that facility.

As of June 30, 2009, on an as adjusted basis to give effect to this offering and the application of the estimated net proceeds in the manner described above, we had a total capitalization of \$1,803 million, total debt of \$1,087 million and total long-term debt of \$1,087 million, including \$452 million outstanding under our senior secured revolving credit facility and \$435 million of indebtedness associated with our 10¼% senior notes due 2014. The \$325 million of 10¼% senior notes due 2014 issued on May 27, 2009 are recorded at their discounted amount of \$304 million, with the discount to be accrued over the life of the senior notes. The \$125 million of 10¼% senior notes issued in this offering are recorded at a premium of \$6 million, which will be amortized over the life of the notes using the effective interest method. This information supplements the information contained in the capitalization table under the column heading "As Adjusted" on page S-30 of the preliminary prospectus supplement dated August 11, 2009.

In addition, as of June 30, 2009, after giving effect to this offering and the application of net proceeds therefrom, the notes would have ranked effectively junior to approximately \$452 million of senior secured indebtedness and senior to \$200 million of our 8¼% senior subordinated notes due 2016.

**Pro Forma Ratio of Earnings to Fixed Charges**

Because the proceeds of this offering will be used to repay indebtedness and, when aggregated with the offering of our \$325 million principal amount of 10¼% senior notes due 2014, our ratio of our earnings to fixed charges would change by ten percent or more, we are presenting our pro forma ratio below.

In computing the pro forma ratio, the historical ratio is adjusted by the pro forma interest expense (net) amount calculated as follows:

(1) add to historical fixed charges for the entire period indicated the increase in interest expense, including amortized discount, resulting from our \$325 million principal amount of 10¼% senior notes due 2014, which were issued on May 27, 2009, and the proposed issuance of the notes offered hereby; and

(2) deduct from historical fixed charges for the entire period indicated the decrease in interest costs resulting from the retirement of any debt outstanding (but only for the period of time outstanding if less than one year) which will be or was retired with the proceeds of those offerings.

The pro forma ratio does not give pro forma effect to the East Texas Acquisition, as defined in the preliminary prospectus supplement dated August 11, 2009.

(\$ in thousands, except ratios)	Pro Forma

#### Computation of Pro Forma Ratio of Earnings to Fixed Charges

(\$ in thousands, except ratios)	Pro Forma	
	Year Ended December 31, 2008	Six Months Ended June 30, 2009
Pre-tax income from continuing operations	\$ 158,742	\$ 25,108
Interest expense	\$ 59,551	\$ 39,614
Capitalized interest	\$ 23,209	\$ 12,626
Earnings	\$ 218,293	\$ 64,722
<b>Pro forma ratio of earnings to fixed charges</b>	2.6x	1.2x

For purposes of these tables, "earnings" consists of income from continuing operations before income taxes plus fixed charges and less capitalized interest. "Fixed charges" consists of interest expense and capitalized interest (for both continued and discontinued operations).
